I

Industries, brewing, dairy, wine and food; The use of stainless steel and nickel alloys to combat corrosion in the ———. Connolly 209
Inhibition; Corrosion and corrosion ——— of reinforcing steel. I. Immersed in alkaline solutions. Gouda 198
II. Embedded in concrete. Gouda & Halaka 204
Effect of hydrogen peroxide on ——— of corrosion of mild steel . Mayne & Page 93
Note on autoradiography – its use in examining the ——— of corrosion. Mayne & Page. 94
Inhibitors: Triazoles as ——— of corrosion of mild steel in acids. Sathianandhan *et al.* 270
Iron; Anodic passivation of ——— in carbonate solutions. Thomas *et al.* ... 87
Influence of the cation on the mode of stress-corrosion failure of———in nitrate solutions. Lees & Lockington 167
Passivity of ——— in chromic acid solutions. Brasher *et al.* 264

M

Mattsson's solution; An empirical relationship between time of cracking and variation in composition in stress-corrosion studies in ———. Chatterjee & Sircar 128

N

Nickel; Electrodeposited ——— as a protective coating for uranium in unsaturated air near ambient temperature. Owen & Alderton 217

O

Oxidation; Cyclic ——— of nickel-base alloys and heat-resisting steels. Fleetwood & Whittle 131
Oxide films; Intake of phosphate ions by ——— on mild steel. Thomas 41
Effects of alloying and irradiation on the ——— behaviour of zirconium alloys. Campbell & Tyzack. 172
Oxide scales; Structure and adhesion of ——— on iron–aluminium alloys. Bateman & Rolls 122

P

Paints; ——— for the protection of steel – a review of research into their modes of action. Mayne ... 106
Passivation; Anodic ——— of iron in carbonate solutions. Thomas *et al.* ... 87

PAGE

Passivity; ——— of iron in chromic acid solutions. Brasher *et al.* 264
Polarisation resistances; Frequency dependence of ——— measured with square-wave alternating potential Neufeld & Queenan 72
Potentiostat; A simple laboratory ——— Bentley & Denham 227
Applications of ——— in corrosion studies. West 65
Protection; ——— of aluminium in storage and in transit. Scott & Skerrey 239
Cathodic ——— a review. Morgan ... 237
——— of equipment in storage and transit by sealed flexible covers. Bayley 247
——— of steel bridges from corrosion. Smith & Day 151
Protectives; Temporary ——— for preventing corrosion of plant and machinery. Bryde 252

S

Steels, chromium and chromium–nickel; Oxidation of heat-resistant ——— Vyklický & Měřička 162
Steel; Corrosion fatigue in high carbon ———. Rollins *et al.* 33
Steel; Corrosion and corrosion inhibition of reinforcing ——— I. Immersed in alkaline solutions. Gouda 198
II. Embedded in concrete. Gouda & Halaka 204
Steels, heat-resisting; Cyclic oxidation of nickel-base alloys and ———. Fleetwood & Whittle. 131
Steels, low-alloy; Corrosion-resistant ———: a review with particular reference to atmospheric conditions in the United Kingdom. Chandler & Kilcullen 24
Steel, mild; Effect of hydrogen peroxide on inhibition of corrosion of ———. Mayne & Page 93
Triazoles as inhibitors of corrosion of ———. Sathianandhan *et al.*... ... 270
Uptake of phosphate ions by oxide films on ———. Thomas 41
Steel; Paints for the protection of ——— – a review of research into their mode of action. Mayne... 106
Steel; Release of water-soluble species from the oxides formed on 20%Cr 25%Ni/Nb-stabilised ———. Robins *et al.* 46
Steels, stainless; Electron microprobe study of the effect of sulphide inclusions on the nucleation of corrosion pits in ———. Szklarska-Smialowska *et al.* 159
Study of 'deposit corrosion' of ——— in aggressive atmospheres. Agabio & Tamba 112
The use of ——— and nickel alloys to combat corrosion in the brewing, dairy, wine and food industries. Connolly 209
